

grafik collection

grafik collection tiles are inspired by photographs of artist Cy Twombly's apartment in Rome, Italy, taken by Horst P. Horst in the 1960s for *Vogue*.

grafik relates ageless motifs in a new way, the effect adapts to different settings, and can take on various characteristics and moods depending on how the tiles are laid, how borders are placed and the overall context within which they are used in the design of a space. Modern doesn't have to be austere or cold. Whether you place on the floor or wall, in a modern or classic space, **grafik** creates a focal point, and lends warmth and style to any setting.

Usage: All interior walls and floor applications.

Made to order. Allow production time.
